

Jeff Nickson

National Rail Operations Manager

jeff.nickson@ticrail.com.au

"Providing quality management and operations support to the wider rail industry within Australia."

Background

I am currently the National Rail Operations Manager at TIC Rail. I have extensive knowledge and understanding of Rail Operations Training, supported by 27 years of experience in the education and training field.

As a Tutor Driver, I trained individuals from a wide range of backgrounds and experience levels. This role allowed me to develop strong mentoring and coaching skills to a high professional standard.

Throughout my career, I have worked with all cargo types, including coal, iron ore, grain, freight (including dangerous goods), and passenger trains. I have gained vast experience working in Western Australia and the Pilbara region.

I also have extensive knowledge of shunting, train testing, manual handling, fatigue management, ATP, DP, ECP, and ICS systems, as well as hazard identification, risk management, rail terminology, the use of various communication systems, and Safeworking systems.

Over the years, I have delivered a wide range of rail operations training courses, specialising in train driving, shunting, and examinations. I am available to facilitate rail operations and a variety of training services nationally.

My skill set also includes courseware development, validation of training as an industry subject matter expert (SME), VET compliance, and conducting rail investigations.
